Arpit Dwivedi

Address: India**Mobile:** (+91) - 9532294061 | **Email:** 8arpitdwivedi798@gmail.com**LinkedIn Profile Link:** <https://www.linkedin.com/in/dwivedi-arpit/>

PROFESSIONAL SUMMARY

- **Senior Product Engineer with 5+ years of software development experience** and proven progression from Digital Specialist Engineer to Specialist Programmer and Product Engineer to Senior Product Engineer, reflecting consistent technical growth and ownership.
- Expertise in C#, .NET Core, Angular, RESTful APIs, Microservices, SQL Server, and Azure, delivering enterprise-grade applications across multiple industry domains.
- Hands-on experience managing the end-to-end development lifecycle, spanning database creation, stored procedures, API development, front-end development, testing, and CI/CD automation.
- Proven track record of delivering scalable web applications and enterprise solutions across the oil, chemical, beauty, logistics, and ingredient management domains.
- Contributed to legacy application modernization, redesigning applications originally developed around 2010 using modern .NET Core and Angular technologies.
- Strong focus on quality and engineering excellence, with 90%+ unit test coverage, CI/CD automation, SonarCloud integration, and automated deployments.
- Extensive stakeholder collaboration experience, including requirements gathering, product demonstrations, product-owner collaboration, Agile ceremonies, and architectural discussions.
- Published Apress author and active technical contributor, with experience in technical writing and building a 10,000+ developer learning community.

WORK EXPERIENCE

May 2023 – Present

Senior Product Engineer at Kline Company, Gurugram***Career Growth:***

- Joined as a Product Engineer in May 2023 and earned a promotion to Senior Product Engineer in October 2025, reflecting strong technical ownership, consistent delivery, and growing contributions to product development and business objectives.

Key Responsibilities:

- Lead development efforts within the IC team, translating complex business requirements into client-facing analytical solutions across the beauty, oil, and chemical industries.
- Design & develop sophisticated web applications tailored to precise client specifications, seamlessly integrating advanced data visualizations and complex calculations.
- Handle the full development lifecycle, from designing databases and stored procedures to building robust APIs using .NET and LLBLGen Pro for ORM. Leveraged SQL Server for backend data management and utilized DevExtreme and Angular to craft intuitive, high-performance front-end interfaces.
- Maintain close collaboration with product owners through requirement gathering, conducting demos, and aligning deliverables with strategic business objectives.

Key Projects:

- 1) **Base Stock IC:** Created a dynamic web application for the oil sector, delivering detailed data visualizations through charts and interactive maps.
- 2) **Kline Ingredient Tracker (KIT):** Developed a comprehensive ingredient management system capable of handling extensive datasets and complex processing workflows.
 - **Tech Stack (Base Stock IC & KIT):** “.NET Core, Angular, DevExtreme, SQL Server, Web API, LLBLGen Pro (ORM), Entity Framework, Azure, Azure Blob Storage, Figma, Azure DevOps, CI/CD Pipelines, Microservices Architecture, Parallel Processing, Multithreading, xUnit Testing Framework.”

Additional Contributions:

- Built end-to-end CI/CD pipelines that automated over 90% of deployment workflows and were adopted across API projects, reducing release delays from 1–2 days to around an hour or less.
- Integrated SonarCloud into CI/CD pipelines, reducing code duplication from approximately 30% to below 10% and improving the code quality/security rating from B to A.

Jan 2021 - May 2023

Specialist Programmer at Infosys, Pune, India

Career Growth:

- Joined as a Digital Specialist Engineer in January 2021 and progressed to Specialist Programmer in January 2022, demonstrating strong technical expertise, consistent performance, and the ability to take on increasing responsibilities in software development.

Key Responsibilities:

- Co-designed, developed, and maintained scalable RESTful APIs and microservices using .NET Core (C#), ensuring robust code quality with 90%+ unit test coverage using xUnit.
- Developed reusable Angular 9 components with dynamic, rule-based business logic, enabling seamless integration with downstream systems and improving application maintainability.
- Contributed actively to Agile development practices, including sprint planning, retrospectives, technical discussions, and architectural decision-making.

Key Projects:

1) Logistics Client - Application Modernization & Finance Module

- **Contributed across 2 key teams: Legacy Application Modernization and Financial Processing.**
- Modernized legacy ASP.NET/AJAX applications originally developed around 2010 by analyzing existing implementations, documenting and proposing application-level architecture in collaboration with architects, and rebuilding approved solutions using .NET Core and Angular through development, testing, and deployment.
- In the Finance Module, developed and enhanced core services responsible for complex charge and pricing calculations, including driver, distance, and mode-based pricing models.
 - **Technology Stack:** .NET Core, C#, Angular 9, Web API, SQL Server, Elasticsearch, Couchbase, Azure DevOps, SonarCloud, JIRA, Confluence, Microservices Architecture.

SKILLS

- | | |
|---|-----------------------------|
| • Web Application Development | • API Development |
| • Legacy Applications Modernization | • Deployment Automation |
| • RESTful API & Microservices Development | • Requirement Gathering |
| • Front-End Development | • Stakeholder Collaboration |
| • Backend Data Management | • Database Creation |
| • Service Design & Modernization | • Agile Methodologies |
| • Data Visualization | • Low-Level Design (LLD) |
| • Dashboard Development | • Technical Documentation |

TECHNICAL SKILLS

- | | |
|-----------------------------------|---|
| • Languages | C#, JavaScript, TypeScript, SQL |
| • Technologies & Tools | ASP.NET Core, Web API, DevExtreme, Angular, LLBLGen Pro (ORM), Entity Framework, SSMS, xUnit, CI/CD Pipeline, Git, SonarCloud Integration, Jira, Azure Cognitive Search, Azure Blob Storage, Cosmos DB, Azure Service Bus, API Gateway, Elasticsearch, and Azure OpenAI Service Integration |

PUBLICATION

- **Published Author:** Authored CodeMosaic, published by Apress, showcasing expertise in software engineering and technology.

OTHER HIGHLIGHTS

- **LinkedIn Top Voice:** Computer Science: Recognized as a Top Voice on LinkedIn for sharing insights and knowledge in the field of Computer Science.
- **Technical Content Creator:** Maintained a personal technology blog at blog.arpitdwivedi.in, publishing practical articles on software engineering & development.
- **Community Founder:** Founded and grew a free open-source learning community for students and developers, reaching 10,000+ followers on LinkedIn and enabling collaborative learning and open-source contributions.

CERTIFICATION

- **Infosys Cloud Professional Skill Tag:** Awarded for cloud expertise after earning Microsoft Azure AZ-900 (Azure Fundamentals) and AZ-204 (Developing Solutions for Microsoft Azure) certifications

EDUCATION 2016 - 2020

- Bachelor of Technology (BTech) in CSE from GLA University, Mathura, India
